

Quant Developer– Permanent Contract

Compass is a Swiss company specializing in the creation of financial indices and quantitative investment strategies.

Since 2017, Compass team has been developing innovative indices for its clients and supporting them in the various stages of the development of their index product range.

Thanks to our experience, we are one of the most innovative and responsive financial index providers and calculators on the market.

For our French subsidiary, we are looking for a financial engineer - permanent contract (CDI). The position is based in Paris.

Your Role:

- Upskill on the existing proprietary index calculation engine
- Maintain and improve the Python index platform environment
- Understand the new incoming indices and implement their calculation in Python language in the existing architecture
- Manage the daily production process related to the computation and publication (on Bloomberg, Reuters, ...) of client and internal strategies
- Participate in R & D on new indices / strategies developed by Compass
- Provide support to customers

What we are looking for:

- With a Master degree or equivalent, you benefit from solid knowledge in computer development and mathematics
- You have a minimum 2 years' experience in the implementation of systematic strategies
- Strong Python development experience is essential (Flask framework is a plus)
- You master the Windows & Linux environments
- You master the fundamentals of non-SQL databases like MongoDB
- Knowledge of C #, R, HTML & CSS is a plus
- Knowledge of the Bloomberg and Reuters APIs is a plus as well as basic mechanisms of financial products
- You are fluent written and spoken English, French is a plus
- You want to join an innovative startup in the financial field

Compass is a young company that offers a significant evolution perspective to his employees. Compass offers great flexibility in the organization of working time.

Compensation: competitive fixed salary + bonus
